

Marine Short Kit Contents

- 1 - Wiring harness 8m long
- 2 - Rotary control (Airtop 2000S)
- 3 - Rotary control & vent switch (Airtop3500/5000)
- 4 - Remote cabin air temp sensor 20m long
- 5 - Air inlet grill
- 6 - Heater c/w stainless steel mount bracket & screws
- 7 - Duct reducer 90 to 80mm Airtop 3500 only
- 8 - Mirror finish stainless exhaust skin fitting
- 9 - Stainless steel exhaust c/w insulation
- 10 - Exhaust hose clamp
- 11 - Fuel pump extension harness 6.5m
- 12 - Copper fuel line 7m
- 13 - Combustion air intake
- 14 - Fuel pump c/w anti-vibration mount
- 15 - Stainless P clips and screw (10 off)
- 16 - Fireproof fuel hose joiner (4 off)
- 17 - Fuel tank stand pipe

Should I fit duct insulation?

YES! For a small increase in total system cost, Thermoduct will improve heater performance by up to 100%. Some multiple vent, or long systems are only recommended when Thermoduct is fitted. Thermoduct increases heating performance, by reducing heat loss, which reduces running time, which reduces electrical power usage, which increases service life.
