

# Tyre Changer for Cars & Light Commercials

Excellent value for money, reliable and easy to use

## Automatic MDP4886

A professional tyre changer incorporating a pneumatic tilting column for fast wheel location, allowing head and rim alignment to be carried out in one operation.

Designed to be used with optional 3<sup>rd</sup> and 4<sup>th</sup> arms (assistants), enabling the operator to change low profile or run flat tyres.

## Semi-automatic MDP4800

Fitted with an off-set arm, the MDP4800 offers an excellent cost-effective solution that provides low volume users with the latest in electronic technology for fast and simple operation.

The robust structure and high capacity ensures safe tyre replacement.

- Self centring turntable
- Protective wheel clamps
- Dual rotation
- Easily identifiable controls
- Reinforced bead breaker arm
- Handy tool storage

Technical specifications	4880	4886
Inside clamping	12" - 23"	12" - 23"
Outside clamping	10" - 20"	10" - 20"
Maximum rim width	305 mm (12")	406 mm (16")
Maximum wheel diameter	960 mm (37")	1040 mm (40")
Power of bead braking	2,5 T	2,5 T
Air pressure	8 - 10 bars	8 - 10 bars
Power supply	380 V Tri	380 V Tri
Motor rating	0,75 kw	0,75 kw
Weight	185 Kg	218 Kg

## Automatic MDP4895

Equipped with a pneumatic back tilting column, the MDP 4895 is designed for intensive use on cars and light commercials.

### Technical specifications

### 4895

Inside clamping	15" - 28"
Outside clamping	13" - 24"
Maximum rim wight	406 mm (16")
Maximum wheel	1200 mm (47")
Power of bead braking	2,5 T
Air pressure	8 - 10 bars
power supply	380 V Tri
Motor rating	0,75 kw

### Accessories included 4800 – 4886 – 4895 :

- Plastic jaw pad (5)
- Plastic covers for bead breaker blade (2)
- Plastic inserts for operative head (5)
- Lever with plastic protection
- Lubricant can with aspergillum
- Air inflator gun
- Magnetic valve core remover

### THIRD ARM (ASSISTANT) 4335

Facilitates the safe removal of low profile tyres without damaging the rim on alloy wheels.

### FOURTH ARM (ASSISTANT) 4330

Recommended for run flat tyres.

Mobile bead breaker it supplements the functions of the 4335 Assistant by keeping the tyre in the rim channel during its rotation.

## ACTIA MULLER: AN INNOVATING COMPANY

2 HIGH TECH MANUFACTURING SITES  
TO SERVE OUR CUSTOMERS

### Circuit Boards

We manufacture our circuit boards at a factory owned by our parent company ACTIA near Toulouse. We also design circuit boards to high industry standards.

Recognized worldwide for the quality and reliability of its products, our parent company has customers in the fields of aeronautic design, transport, medical supplies etc. - areas where a secure manufacturing process is key. In the interests of achieving zero defects, we have standardised our manufacturing and have imposed a high level of conformity and reliability on our products.

### Test lanes & garage equipment

Our factory near Paris is dedicated to product assembly, with an emphasis on ergonomics and design.

Our range of products, which is approved by professionals in the motor industry conform to the ISO standard.

We have highly skilled staff and a dynamic research and development department which allows Actia Muller to remain the innovative specialist in garage equipment.
